

OpenGambit TECHNOLOGIES

Solutions simplified

Faced with constant upheavals in the technology landscape and pressure to stay quick and efficient in a competitive industry, it can be difficult to keep your company's software infrastructure up-to-date. To successfully update your infrastructure, you need the help of process-driven software architects with consistent vision and follow-through.

OpenGambit is a team of software experts who are passionate about the promise of open source systems, and have consistently been at the cutting edge of business technology. We will work as a technology partner with your company to provide seamless systems updates, resulting in increased efficiency with no loss of simplicity or information.

PRODUCTS

SimplifySubmission®

is an easy to use, Web-based underwriting system that allows agents, brokers, insurers, consumers and other users to qualify, rate, quote, bind and virtually deliver policy documents in minutes. The ability to process online in realtime allows insurers to reduce policy issuance from weeks to minutes — making selling even small premium and low limit products worthwhile for agents.

SimplifyForms®

is an intuitive, user-friendly framework designed for forms printing and distribution. Using template-based mechanisms, carriers can easily create forms, associate them with appropriate coverages, and print using a clear-cut, web-based interface.

SimplifyPlatform®

is a high-performance, best-of-breed J2EE platform that organizes discrete software components in a layered architecture of common services, with the goal of writing code once for maximum reuse and ease of maintenance.

SERVICES

System integration

Seamless system updates that work with what you already have. Never lose data in an upgrade again!

Business Process Management

We take a critical look at your processes and use automation, virtualization, and custom architecture to make them flow as smoothly as possible from Step One to conclusion.

Mobility Services

Offer on-the-go access to your agents -- and your customers! Mobile applications set your software experience free.

Cloud Consulting Services

Receive expert analysis and advice, anywhere in the world! We take a good look at your systems and listen to what you need, without the hassle of organizing meetings.

Enterprise Project Management

Experience project management without a doubt. Reliable updates, instant communication, and realistic planning take the uncertainty out of your system transition.

Business Intelligence

Analyzing your business to support the smartest possible decisions. Data analysis, performance management, predictions for the future.

Blueprint Services

A clear plan of attack for your infrastructure upgrade. Service oriented architecture starts by listening to your concerns, and providing you with full access to the planning process.

OUR VISION

First business, then technology.

As open-source software architects, we can be very passionate about our technology. But without the businesses who come to us with their needs, our work would be nothing but an academic exercise. We create our cutting-edge applications through business partnerships based on commitment, respect and trust. We constantly strive to shorten your time-to-market, fill the expertise gap, and control development costs to deliver what your business needs to succeed.

Our mission is to provide Mid-Level Enterprises with a solid foundation on which to build a scalable IT infrastructure, and to provide value to businesses through technology.

OUR VALUES

Credibility

We set high standards for ourselves, and always strive to gain the respect and trust of our clients. We won't make a promise unless we know we can deliver on it.

Leadership

We love challenges, and have the vision to accomplish big things. Our customers know that we take their success as seriously as our own.

Integrity

We take utmost pride in our work. Every task is an opportunity to demonstrate our attention to detail and our commitment to quality.

Meritocracy

Our office environment fosters a willingness to listen and challenge each other when needed. This brings out the best within all of us, to our clients' benefit.

Teamwork

We know that to achieve a common goal, it helps to work as a team. Strong communication and shared goals let us become more than the sum of our parts.
